PENTAMED® FILM WITH ENHANCED AESTHETICS NOW AVAILABLE FROM KLÖCKNER PENTAPLAST

Gordonsville, Virginia – November 9, 2008 – The Pentamed® film product line has been extended to include Pentamed® MD-M282/21 rigid vinyl film. Pentamed® MD-M282/21 film is engineered to provide superior aesthetics for heavy-gauge medical-device film applications. Available in 20-30 mils, this film is ideal for packaging heavy, large medical devices in a clear, transparent package. Pentamed® MD-M282/21 film is available worldwide.

As with all Pentamed® vinyl films, Pentamed® MD-M282/21 film has excellent forming, cutting, sealing, moisture and oxygen barrier properties, and is EtO sterilizable. This film is compatible with a variety of lidstocks.

“Pentamed® MD-M282/21 films were developed to meet customers’ packaging requirements for a cost-effective, visually superior film for heavy-gauge medical-device applications,” notes Justin Glass, Klöckner Pentaplast’s business manager of medical device films for the Americas. “The expansion of our medical-device film range to include this film, along with our existing Pentamed® PETG, APET, vinyl, A/MA/B, HIPS, PP, and PETG/ACLAR® films, continues to provide our customers with the broadest selection of films available in the global marketplace today.”

About the Klöckner Pentaplast Group

The Klöckner Pentaplast Group is the world’s leading producer of films for pharmaceutical, medical device, food, electronics, and general-purpose thermoform packaging, as well as printing and specialty applications. Founded in 1965 in Montabaur, Germany, Klöckner Pentaplast has grown from its initial facility to 20 current production operations in 11 countries.

The Klöckner Pentaplast Group is wholly owned by affiliates of The Blackstone Group. The
