FOR IMMEDIATE RELEASE

KLÖCKNER PENTAPLAST TO SHARE PHARMACEUTICAL PACKAGING SOLUTIONS AT ASEAN PHARMA PACKAGING CONFERENCE 2017

Montabaur, Germany – September 14, 2017 – Klöckner Pentaplast will present the latest range of pharmaceutical and medical device packaging solutions and services at ASEAN Pharma Packaging Conference 2017 (APPCON), November 2 – 3, 2017, in Mumbai, India. The kp team will update visitors on BlisterPro® XCEL Services and introduce the newest packaging innovation, Pentapharm® LiquiGuard™. In addition, Daniel Stagnaro, Product Marketing Manager, Barrier Products, will present a session entitled, “High Technology Film for High OEE in High Speed Line” at 12.30 P.M. on November 2, 2017.

BlisterPro® XCEL Services

Klöckner Pentaplast’s BlisterPro® XCEL Services optimize the union of product and packaging. Protective barrier properties of the final package are predicted reducing or eliminating the need for expensive and time-consuming line trials. For over 50 years Klöckner Pentaplast has been a leader in producing high performing barrier films; the addition of BlisterPro® XCEL material selection and design execution has become a science, setting kp apart from other film producers. Imagine the value created when many months of design, testing and feedback can now, in many cases, be accomplished in weeks. Based at the first kp i.center, located in Charlottesville, VA (USA), the expanded BlisterPro® XCEL suite of design services offers a collaborative space specifically configured to help global customers bring products to market more quickly and economically.

Pentapharm® LiquiGuard™

Klöckner Pentaplast will introduce LiquiGuard™, the latest inventive addition to the Pentapharm® line of pharmaceutical blister films. With Pentapharm® LiquiGuard™, hot- and cold-fill liquids and semi-solids can be formed and packaged directly in a crystal-clear, thermostable laminate film that protects sensitive products from package leaching and moisture gain or loss. “Pentapharm LiquiGuard™ provides an advanced option for unit dose packaging of liquid or semi-solid medications that require resistance to extreme temperatures from hot (120°C filling) to cold (-183°C and lyophilized) during processing, while offering all the benefits of a clear, thermoformable blister film with a customizable moisture barrier,” states Frank Oliveri, Director Global Business Development, Pharmaceutical Packaging.

About Klöckner Pentaplast

The Klöckner Pentaplast Group is a global leader in rigid and flexible packaging, printing and specialty solutions, serving the pharmaceutical, medical device, food, beverage and card markets, among others. Through the acquisition of LINPAC, an international market leader in the production of primary fresh food packaging and food service solutions, kp expands its capabilities, providing multi-material technology and offering a wide range of flexible films, from complex multilayer barrier films to simple monolayer structures. With a broad portfolio of packaging, films and services powered by innovation, Klöckner Pentaplast plays an integral role in the customer value chain by marketing and protecting product integrity, safety, consumer health and brand reputation. Klöckner Pentaplast has operations in 18 countries and employs over 6,300 people across 32 locations committed to serving customers worldwide. For more information, visit www.kpfilms.com.
