PENTACARD® COLOR CORE FILMS FOR SECURE CARDS NOW AVAILABLE FROM KLÖCKNER PENTAPLAST

Gordonsville, Virginia – April 15, 2012 – The Pentacard® film product line has been extended to include Pentacard® color core stock films. Ideal for secure card applications, such as financial magnetic stripe transaction, RFID, and dual-interface cards, and compatible as the core layer in full-face foil cards, Pentacard® color core films are designed to create unique branding opportunities for the card issuer. Klöckner Pentaplast is the only global supplier to produce these films on three continents.

Pentacard® color core films are available in a wide variety of standard and custom colors. As with all Pentacard® core films, these films deliver absolute consistency, superior performance for improved card yield, uniform sheet squareness, excellent color consistency, exceptional printability, and easy die cutting. Available in roll or sheet, these matte/matte films are offered in 5-30 mil thickness.

“Pentacard® color core films were developed to provide card issuers with unique branding opportunities for their secure cards,” notes Tom Mucenski, business manager of card films, Klöckner Pentaplast/Americas. “The expansion of our Pentacard® product portfolio to include these films, along with our existing Pentacard® film line of core and overlay films, continues to provide our customers with the broadest available selection of films in the industry.”

About the Klöckner Pentaplast Group

The Klöckner Pentaplast Group is the world's leading producer of films for pharmaceutical, medical device, food, electronics, and general-purpose thermoform packaging, as well as printing and specialty applications. Founded in 1965 in Montabaur, Germany, Klöckner Pentaplast has grown from its initial facility to 17 current production operations in 11 countries.
