PENTACARD® KPFOIL™ FILMS FOR FULL-FACE FOIL CARDS NOW AVAILABLE FROM KLÖCKNER PENTAPLAST

Gordonsville, Virginia – April 15, 2012 – The Pentacard® product line of card films has been extended to include Pentacard® kpFoil™ film for full-face foil card applications. Full-face foil cards permit enhanced brand appeal with graphics that have brilliant shine and reflection which is unobtainable with conventional ink on white print stock. Available in PET/Foil/PVC or PET/Holographic/Foil/PVC laminated structures, Pentacard® kpFoil™ films are engineered to be processed with standard card lamination and print methods. These films are ideal for secure and non-secure cards, such as bank, RFID, gift, loyalty, club, and membership cards.

Pentacard® kpFoil™ films meet all ISO card requirements, including peel strength and flatness, and have a superior smooth surface. Available in 6 to 30 mils, these films are offered in standard foil patterns (rainbow, bright silver) and unique patterns (cracked ice, brushed metal, diamond deck, swirl). Custom patterns are available upon request.

“Pentacard® kpFoil™ films for full-face foil cards were engineered to provide customers with options for creating cards with high-impact graphic appeal,” notes Tom Mucenski, business manager of card films, Klöckner Pentaplast/Americas. “The expansion of our Pentacard® product portfolio to include these films, along with our existing Pentacard® film line of core and overlay film, continues to provide our customers with the broadest available selection of films in the industry.”

About the Klöckner Pentaplast Group

The Klöckner Pentaplast Group is the world’s leading producer of films for pharmaceutical, medical device, food, electronics, and general-purpose thermoform packaging, as well as printing and specialty
