

Group Sustainability Policy

OUR VISION

The sustainable protection of everyday needs through innovative films and trays that help provide product safety, avoid food waste, safeguard medication and medical devices, and protect the integrity of countless durable products.

OUR MISSION

We innovate, design and manufacture for sustainable solutions that our customers use to package and protect products in daily situations around the globe. We understand our obligation and responsibility to champion a circular economy where plastics are a source of valuable raw material.

We embrace our responsibilities and we will comply with and exceed where practicable all applicable national and local laws and regulations of each country in which we operate. We recognise the importance of operating as a responsible business and we aim to minimise our environmental impact, take action on climate change and provide a safe, diverse and inclusive workplace where our colleagues can thrive.

OUR SUSTAINABILITY COMMITMENTS

Close the Loop

- Apply a product lifecycle approach when designing and innovating products, where we take into account recyclability and circularity guidelines to ensure that we take the right steps in order to drive circular economy.
- Aim to use the highest amount of recycled material where possible while ensuring that our products remain effective and do not increase food or pharmaceutical waste and preserve the products that they contain.
- Optimise the weight of our products, while ensuring product protection and preservation.
- Collaborate with key stakeholders in the supply chain to drive solutions to meet our collective commitments that address global challenges such as food security and food waste, product integrity, climate change and resource conservation driving towards a circular economy.

Work Smarter

- Measure and monitor the environmental performance at sites.
- Implement new technologies and processes to reduce our use of water and energy whilst increasing our use of energy from renewable sources.
- Adopt the waste hierarchy of waste prevention, reuse of materials, recycling, co-processing and energy recovery to minimise waste disposal and maximise productivity.
- Optimize logistics, to improve fleet efficiency and minimize emissions from distribution.
- Manage our operations and activities to minimize pollution and help protect biodiversity and ecosystems.

Group Sustainability Policy

Act Responsibly

- Maintain an environmental management system and work towards continuously improving performance.
- Develop and implement action plans to ensure the health, safety and mental wellbeing of our employees.
- Be an equal opportunities employer by having a business culture which is diverse, equitable, inclusive, respectful and promotes personal development
- Support the communities in which we operate and trade and make a positive contribution by giving back to those communities.
- Partner with customers, retailers, suppliers, industry organisations, non-governmental organisations and other key stakeholders on environmental and social issues, to support the delivery of our objectives and to raise awareness, both internally and externally.

Specific goals that support these aims can be found within kp's sustainability strategy "[Investing in Better](#)". Performance against these goals will be published externally on an annual basis.

ADDITIONAL POLICIES

We conduct our global operations in compliance with our company policies which include our Code of Business Conduct and Ethics, Group Safety Policy and more, all of which are available upon request.

We will communicate this policy to our customers, suppliers, local communities and other key stakeholders. We aim to review this policy biannually.
